Rotary Drum DMS

For applications requiring a finite set of changeable messages, Skyline Products' NTCIP, NEMA TS4, AASHTO, and MUTCD compliant Rotary Drum DMS are a perfect solution and offer the highest return on investment (ROI) in the industry. Skyline will custom design an extremely reliable, highly durable Rotary Drum DMS to meet your specific project requirements.

Features

- Fully NTCIP, NEMA TS4, AASHTO, and MUTCD compliant
- ITS-Grade® durability and reliability
- Simple, reliable design with Skyline Product's high-quality craftsmanship
- Virtually maintenance-free
- Field-proven experience in the harshest environments since 1991
- Extremely low continuous power consumption; required for the controller and modem only
- Instant legibility day or night with full-bodied characters and standard highway retro reflective materials
- Confirmation feedback verifying the true drum position and message displayed via local and central control software
- ISO 9001:2015 certified manufacturing

Skyline Rotary Drum DMS can be integrated into any existing ITS network or system.
