Walk-In LED DMS

Skyline Products' NTCIP, NEMA TS4, AASHTO, and MUTCD compliant Walk-In LED DMS offer the highest return on investment (ROI) in the industry and offer the most flexibility for communicating critical advisories to motorists moving at high speeds. These walk-in signs accommodate 3 lines of 18-inch characters and the ability to display graphics. They are designed for overhead or roadside permanent mounts. True 18-inch characters of high-quality LEDs are legible from a distance of 1,200 feet; an unrivaled industry benchmark.

Amber Walk-In DMS
- Color configurations available in 20mm, 35mm, 48mm, and 70mm pixel pitches

Full Color Walk-In DMS
- Color configurations available in 20mm, 35mm, 48mm, and 70mm pixel pitches

Features

- Reliably, legibly, and safely communicate up-to-the-minute incident, weather, construction, congestion, and public safety alerts to high-speed motorists
- Minimize agency liability and increase safety for the motorist and the technician by performing maintenance from within the sign without closing lanes
- Remotely monitor every critical component of the sign with advanced, comprehensive feedback capabilities
- Receive ITS-Grade® quality and value from any of our high-quality solutions
- Realize a high return on your agency and community investment
- Supported by Skyline Products Customer Service
- ISO 9001:2015 certified manufacturing

Skyline Walk-In LED DMS can be integrated into any existing ITS network or system.

Designed to be **bold.** Engineered to **last.**

[1] The number of characters per line depends upon the font and inter-character spacing. [2] The ventilation options varies the depth of the sign. These sign depths can range from 6" to 21" depending on this ventilation option and mounting configuration. The various ventilation options include: N = Non-Ventilated, V = Std. Ventilation, A = Adv. Ventilation. [3] Weight depends upon selected options.
