

# LED Retrofit Panels

Price is the number one reason consumers choose one gas station over another. If your sign isn't accurate, or customers can't read it - you're missing out on fuel sales.

## Make Your Price Signs Look New Again

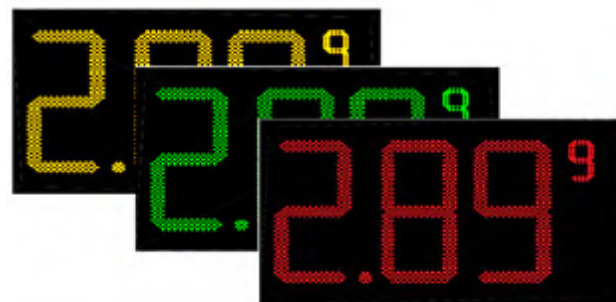

Whether you're tired of manual signs or looking to update your existing, faded LED boards, Skyline's Retrofit Kits replace your existing LED panels or manual price digits, improving curb appeal and your brand image. Our Retrofit panels are made with the same high quality standards we're known for, and come with industry-exclusive full feedback technology.

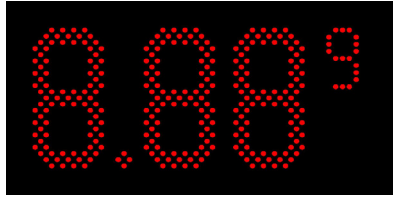

## Confidence In Accurate Pricing

Our patented feedback process ensures that the right price is showing at all times. Skyline's customers enjoy up-to-the-minute feedback and diagnostics with the most robust feedback and diagnostic system on the market. Plus, by using PriceAdvantage Sign Diagnostics, users can have access to diagnostic information from headquarters.

## Product Specifications

- Available in 8" - 86" digit sizes
- Easy, drop-in replacement in your existing sign housing.
- LEDs available in red, green, amber, blue, or white
- Radio controlled with industry-exclusive full feedback handheld
- Patented feedback and diagnostic capabilities to ensure accurate price displays at all time
- Fully compatible with most POS systems
- Built to last; ISO 9001:2015 certified
