

Electronic Scroll Price Signs

Whether city ordinances prevent you from using LED signs, or you are looking for a unique, branded sign that utilizes your distinct colors, Skyline Products offers the only true electronic scroll solution in the marketplace.

Affordable, Energy Efficient, Low Total Cost of Ownership

Less power consumption. Less maintenance. Less downtime. Scroll signs are truly the most efficient solution on the market place - ensuring you don't spend valuable resources on maintaining your sign.

- Since scroll have very few points of failure, they are proven to have incredibly high reliability and significantly lower cost of ownership.
- One of our largest customers determined that over a 10 year period, the total cost of ownership for scroll signs was about 30% less than LED signs.
- Skyline scroll signs have been installed and functioning in the market place for over 30 years - a true long term investment.

Confidence In Accurate Pricing

Our patented feedback process ensures that the right price is showing at all times. Skyline's included handheld gives the user up-to-the-minute feedback and diagnostic information by actually reading the face of the sign - not simply reporting the last message that was sent. Plus, with PriceAdvantage Sign Diagnostics, customers can view diagnostic and feedback information remotely from headquarters.

Superior Legibility + Visually Distinct

Ensure customers can quickly and easily read your sign in all lighting conditions. Skyline signs are packed with features that increase legibility - no matter the lighting condition.

- Our backlit film signs provide a classic, full digit for superior wide viewing and unmatched readability.
- Standard and special order colors are available, providing a unique image and a true visual differentiator.

Product Specs

- 10" to 91" digit sizes available
- Standard colors: white on black, white on red, white on green, white on blue
- Custom digit and cabinet colors available
- Single and double face configurations
- Internally lit commodity panels and digits
- Plug-in, hardwire, radio, or cell control.
- POS interfaces with Allied Electronics, Excentus, Fiscal Systems, Gilbarco, NCR Radiant Systems, Retalix, Verifone, and others.

Applications

- Canopy signs
- Monument signs
- High rise and goalpost signs
- New Construction

Electronic Scroll Price Signs

All of our price signs are designed to the most extreme standards and engineered to increase legibility and reliability. Furthermore, it is our goal to provide a product that is both flexible and delivers the lowest total cost of ownership possible.

Robust and Simple, Field-Proven Design

Scroll price signs have very few mechanical and electrical components providing limited points of failure - keeping your sign functioning properly at all times.

Silicon Conformal Coated Circuit Board Assemblies

Skyline uses a silicon conformal coating for our printed circuit board assemblies, providing greater longevity and higher reliability. Our silicon conformal coating can protect your investment for up to 20 years, versus just 2-3 years for acrylic coated boards.

Classic, Full Bodied Price Digits

Scroll digits provide a clean, classic look that draws your customer's eye and provides a true visual differentiator from your competition.

Patented Feedback Technology

As with LED signs, the control system actively monitors the sign for faults/errors. If an incorrect price is displayed the scroll sign will immediately notify you which digit is reporting an error.

PriceAdvantage Sign Diagnostic Software

When utilizing Skyline's PriceAdvantage Sign Diagnostics software, feedback and diagnostic information can be gather from a remote location.

Backlit Digits for Unmatched Night and Daytime Readability

Backlit film digits do not 'halo' at night and provide superior viewing angles. Scroll signs allow you to be confident that your sign is legible at all times of the day and night - regardless of weather conditions.

Manufacturing to Military-Grade Standards

Heat and other environmental elements can destroy electronic price signs. Skyline has engineered our signs to extreme standards - incorporating military-grade standards and materials - to provide you with the industry's most durable sign that can last up to 20 years.

Highly Customizable with Standard Available Options

Choose a standard color or special order custom colors to match your brand. Many private branded retailers choose scroll signs to help distinguish their brand within their markets.

Minimal Maintenance Required

Skyline scroll signs have been installed and continuously operated for more than 30 years! With limited mechanical and electronic components, long-life drive mechanisms, and UV protected industrial-grade film digits, your signs will display the right price every day for years to come.

Fully Compatible with Most POS Systems

Skyline's price signs are compatible with most POS systems on the market, including Allied Electronics, Comdata, Excentus, Fiscal Systems, Gilbarco, Retailix, NCR, and Verifone.

Affordable and Energy Efficient

One of our largest customers determined that over 10 years, the total cost of ownership for scroll signs is about 30% lower than LED signs. This accounted for acquisition and installation costs, electrical costs, maintenance, parts and services costs as well as lost profits (for sign down time).
